Batam, Riau Islands

SUMMARY

Senior Application Developer and System Architect focused on high-performance backend logic and modular infrastructure. Specializes in building scalable systems governed by strict Standard Operating Procedures (SOPs) to ensure maximum code readability and security. Proven expertise in translating complex business requirements into efficient, maintainable technical frameworks across PHP, Node.js, and React ecosystems.

WORK EXPERIENCE

Luna Park Media

Batam

Executive Fullstack Developer - Full-time

May 2024 - Present

- **Architecture & Standardization:** Engineered a "Website Toolbox" starter kit to standardize agency development workflows, ensuring consistency and high-speed performance across all new projects.
- **Automated HR Ecosystems:** Designed and implemented a custom Recruitment Dashboard with complex backend logic for candidate tracking, automated assessment reporting, and interview feedback loops.
- **Financial & Payment Systems:** Developed robust Stripe API integrations for recurring billing, featuring automated failure handling and Payment Intent retrieval via Invoice ID cross-referencing.
- **Technical SEO & Indexing:** Architected JSON-LD structured data and optimized technical indexing frameworks to maximize organic search visibility and rich snippet performance.
- **Security & Environment Hardening:** Audited server environments to secure exposed API keys and sensitive credentials, implementing server-side access controls.
- **Performance Marketing Tech:** Integrated and optimized tracking environments, including Google Analytics, Facebook Pixel, and AdRoll, to monitor conversion funnels and user behavior.
- **Frontend Product Design (My IQ Test & My IQ Score):** Designed and built the UI/UX and interactive quiz logic (JavaScript, PHP native) for two IQ testing platforms — covering question flow, timing, answer validation, and results/report display.

Freelance

IT Specialist & Developer - Freelance

Sep 2023 - May 2024

- **Geospatial System Engineering (PLN Kepri):** Developed a Geographic Information System (GIS) for customer mapping using the Mapbox API, optimizing data visualization and field service efficiency.
- **Algorithmic Decision Support (PLN & Bank Bestari):** Engineered multicriteria Decision Support Systems (DSS) utilizing PROMETHEE and VIKOR methods to automate team leader selection and loan applicant risk assessment.
- **Educational Platforms (SMP 13):** Spearheaded the end-to-end development of a web-based e-learning application to facilitate digital education and interactive learning.
- **Infrastructure & Custom Software (Bude Mart):** Designed and deployed secure network configurations and customized software solutions for SMBs, focusing on operational efficiency and data security.
